Magnet Harness Sizing Guide

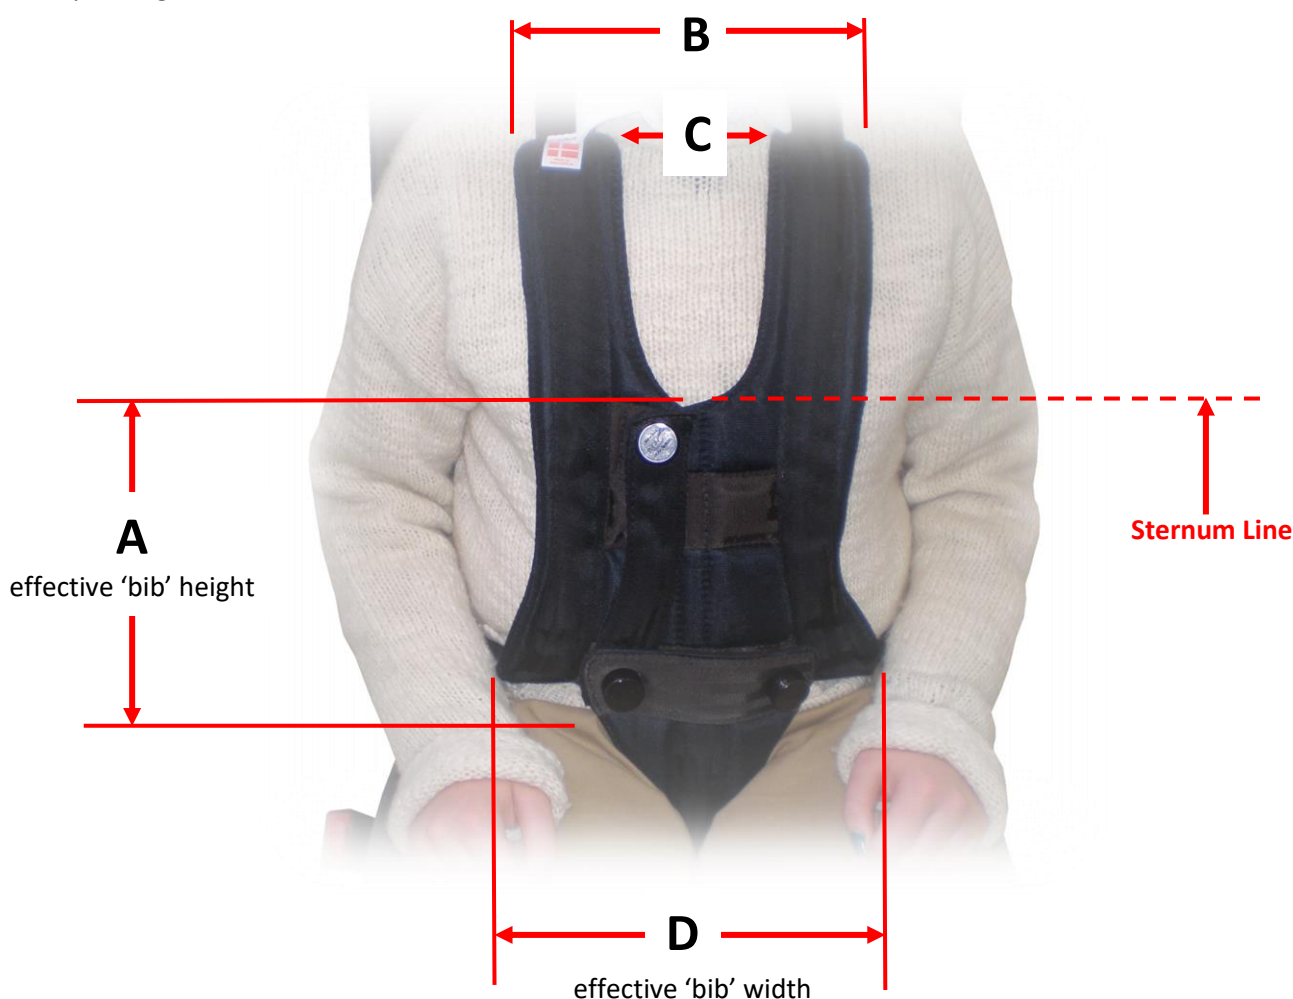

Our View:

G-MH-36S (150036-S) Magnet Harness – Small, suitable from age 4yrs to 12yrs approx.
(when used in conjunction with a suitable booster seat).

G-MH-36M (150036B) Magnet Vest – Medium (Standard size), suitable from age 8yrs approx. to adult.

G-MH-36L (150036V) Magnet Vest – Large, suitable for adult from height 5ft 9” approx. and taller.

- A – bib height is important in relation to the Sternum Line only.
- C – neck width is flexible as the webbing will position in use, although care should be taken to avoid chaffing.
- D – bib width is not a limiting factor as the webbing continues around the passenger’s waist.
- Sternum Line – use this as an upper point limit for the harness neckline to avoid too close a proximity with the passenger’s throat.

Size:	Small	Medium	Large
Code:	G-MH-36S	G-MH-36m	G-MH-36L
A - effective bib height	220mm	260mm	380mm
B - width at shoulders	210mm	250mm	340mm
C - width at neck	100mm	120mm	180mm
D - effective bib width	230mm	290mm	370mm
